A REASONED INVESTMENT FOR LARGE ECONOMIES

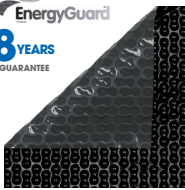

ASTRALPOOL bubble covers offer you many advantages and savings. Their main function is to maintain the **water temperature** at night or when the weather is not favorable, especially if your pool is heated. On average, there is a difference of 3°C with an uncovered pool but up to 7°C of difference can be obtained with certain models (SOL+ GUARD)

Its second main function is to **reduce evaporation**, which leads to savings in water, treatment products and energy if the pool is heated. Finally, it is also a barrier against **possible external dirt** by preventing leaves, dust and other foreign objects from polluting it.

FINISHES

THICKNESSES & COLOURS

	400µ Round bubbles	500µ Geobubble™		
				
Water temperature increase*	Between +3°C & +4°C	Opaque & not solar. Designed for heated pools. Retains heat & maintains water temperature.	+7°C	+7°C

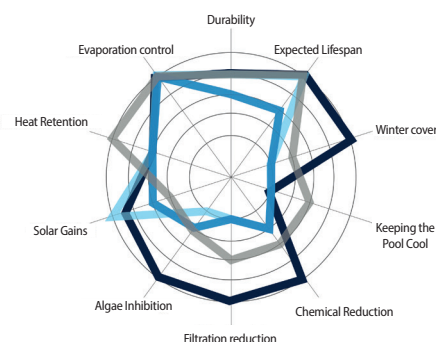

*The data mentioned are indicative & are subject to proper use of the isothermal cover in compliance with the instructions provided.

GEOBUBBLE™

The GeoBubble is characterized by its high resistance against UV and chemical attacks, the design of its bubble is designed to have a regularity in thickness for increased resistance and avoid the breaking points of a traditional round bubble.

 **PLUS PRODUCT**

- + Blue/Gold: increases the thermal efficiency of cover and limits water evaporation
- + Sol + Guard™: offers maximum solar energy gain
- + Energy Guard™: prevents algae blooms in the pool
- + RaeGuard™: maximizes heat and evaporation retention

SPECIFICITIES

Our manufacturing plant can offer you bubble tarpaulins for any basin shape with straight or roman stairs or other cuts (ladder for example), of the same thickness and color as the pool cover.

A rectangular pool with a length of more than 12 m will be made with a scabbard on each width. The dimensions must not exceed 25 x 5 m or 20 x 7.50 m. We recommend insulated foam covers for large sizes or in indoor pools.

MANUAL & MOTORIZED REELS

We have the reel you need to make it easier for you to handle your bubble blanket. ECO reels, Classic, Plus or Motorized, several model variations to adapt to your pool and widths up to 7 m! Our reels come with straps to wrap your blanket.
