INTERLINE 75 & 85,  
INTERLINE VARNISH  
VARNISHED PRINTS
- **Large collection of plain colors and prints**
- **An Exclusive SENSATION<sup>\*</sup> line**

## THE COLLECTION PLAIN LINER

100% Made in France in our own factory, our plain or printed liners are made from top-quality materials. The material is made of uncured polymer and is entirely **RECYCLABLE**.

This choice of manufacture has many benefits:

- **High resistance** to water pressure
- **Very good flexibility** for perfect adaptation to the structure
- **Compliance with the requirements of the French standard NFT 54-803-1**

For pools undergoing renovation or construction, the liner ensures the watertightness of the pool. With its smooth surface and pleasant touch, the liner is hard-wearing and easy to maintain.

### WHAT COLOR LINER SHOULD I USE FOR MY POOL AND HOW WILL IT LOOK IN WATER?

#### BLUE or WHITE

This is the most classic choice. Its color in water is inviting and reminiscent of the sea, whatever the weather.

#### SAND

These very light-colored liners make the water look crystal clear and are reminiscent of a river.

#### GREY

The grey liner makes the water look clear and, depending on the amount of sunlight, tends towards a slightly bluish grey. Iridescent appearance. Contemporary look guaranteed!

#### CARIBBEAN GREEN

This liner color gives a "tropical" look to the pool water. Ideal integration in an environment surrounded by nature.

### INTERLINE 75 & 85
