AUTOMATIC ABOVE-GROUND COVER

- Modern shape and profile
- A collection of 4 two-tone shades
- French manufacturing
- Cover Connect app to control the cover

5 YEARS
WARRANTY
ON MOTOR
AND BOX

Why choose the OCTEO automatic cover

GUARANTEED SAFETY

The OCTEO automatic cover ensures optimal pool safety. It complies with the **NF P90-308** standard according to the safety system chosen:

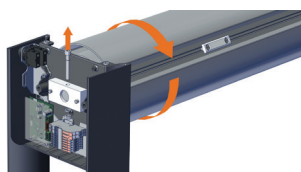

- **Stainless steel safety system**, the cover is compliant if, and only if, the **interior width of the pool is greater than or equal to 2.30 m**.
- **Safety system in ABS** or with **fabric strap**, the cover is compliant if, and only if, the **interior width of the pool is equal to or greater than 2 m**.

Heavy-duty wall- or top-mount clamps close and secure the pool permanently. Once fixed in position, access to the water is not possible*.

Once closed, the OCTEO cover also protects the pool from impurities: leaves, pollen, dust, etc.

It also provides a thermal barrier, reducing water evaporation and heat loss.

TECHNICAL AND PRACTICAL BENEFITS

Moteur débrayable

Easy to use: thanks to its tubular motor fitted in the roller shaft and with a simple turn of the key or from your smartphone via the optional Cover Connect App, the cover rolls up and unrolls in no time.

Disengageable motor: for greater peace of mind and to secure the pool manually in case of a prolonged power cut or other malfunction.

Peace of mind: fitted with a limit switch system as standard. Once closed, the **cover stops automatically at the end of the pool**.

Perfectly adapted to market developments: for users who have opted for water treatment with a salt water chlorinator, OCTEO integrates as standard a box with a contact for controlling the dosing device. According to the instructions you send to the chlorinator, the chlorine will be produced automatically depending on whether the automatic cover is open or closed.

**AESTHETIC,
FRENCH
MANUFACTURE**

Made in France, the OCTEO model was designed in collaboration with a design studio. Its modern, light aesthetics symbolizes the infiniteness of modernity. The combination of its 4 colors has been created in perfect harmony with trends in the highly popular decoration sector: **White/White, White/Dark Grey, Dark Grey/White, Dark Grey/Dark Grey**.

For a bright atmosphere at nightfall, solar LED lamps light up the garden. Autonomous lighting powered by a small solar panel discreetly integrated into the base. And for even more harmony, the stainless steel safety straps match the color of the PVC slats. The 146 or 196 mm diameter roller shaft is made of anodized aluminum and the feet are made of **powder-coated aluminum** for added strength and durability.

** Important: a safety cover is not a substitute for common sense or individual responsibility. It is not intended to replace the vigilance of parents and adults, who still have to be there to protect others, especially young children.*

MOBILE APP COVER CONNECT (OPTIONAL)

Integrated directly in the base, the Bluetooth receiver is invisible to the naked eye.

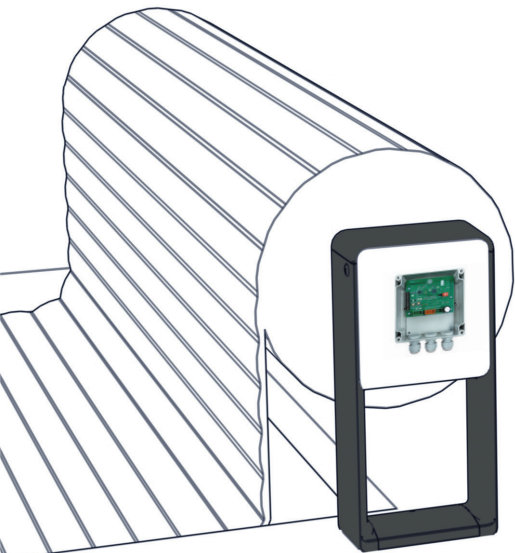

The application lets you open and close the cover easily.

In order to comply with the **NF P90-308** standard, the user must be close to the pool.

After an initial quick pairing procedure, the connection is automatic on an unlimited number of smartphones.

Available on Android and iOS in 8 languages.

As an option, a wireless wall control unit can be fitted for even more versatility and convenience. A key ring remote control is available as an option, but does not comply with the NF P90-308 standard.

Optional: Bluetooth receiver integrated in the base

OCTEO, THE COMPONENTS:

The slats are an integral component of the automatic above-ground cover. They must comply with the standard and be aesthetic and hard-wearing.

The PVC slats guarantee:

- Standard compliance,
- UV and shock resistance,
- A sleek slat profile and a wide range of colors to complement the surroundings,
- Excellent buoyancy and watertightness thanks to the welded caps,
- 3 years waterproofness warranty,
- Compatibility with water treatment by salt water chlorinator,
- PVC slats can be cut to fit all pool shapes and sizes.

OPTION:

WINTERING NET FOR AUTOMATIC COVER

The net cover is a very economical way of protecting your slats in winter and guarantees a much easier and faster reopening of the pool in spring by preventing leaves, pine needles and other undesirable stains from tarnishing the cover. Very light net in grey color, fastened to all 4 corners of the pool.
