Why Choose the SVELTÉA Automatic Cover

GUARANTEED SAFETY

The SVELTÉA automatic cover ensures maximum safety for the pool. Compliant with the **NF P90-308** standard depending on the safety system selected.

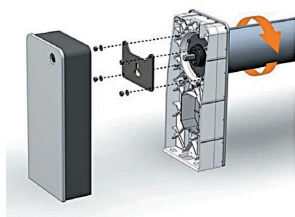

For a pool with a width at water level:

- **from 0 to 1.99 m:** the cover is not compliant with the NF P90-308 standard, regardless of the safety system.
- **≥ 2 m:** the cover is compliant with the NF P90-308 standard with all safety systems (ABS, fabric, or stainless steel), for wall or coping installation. Ultra-resistant clamps, for wall or coping installation, closing off the pool in a safe way. Once fitted, access to the water is blocked*.

Once closed, the SVELTÉA cover also protects the pool from debris such as leaves, pollen, and dust...

It also acts as a thermal barrier, reducing evaporation and heat loss.

TECHNICAL AND PRACTICAL BENEFITS

Ease of use: thanks to the tubular motor fitted in the roller shaft, the cover rolls up and unrolls in no time with a simple turn of the key or from your smartphone via the optional Cover Connect app.

Disengageable motor: for added peace of mind and to manually secure the pool in the event of a prolonged power outage or any other potential malfunction.

Peace and quiet: SVELTÉA is fitted with a limit switch system as standard. Once the closing mechanism is engaged, **the cover stops automatically at the end of the pool.**

Perfectly adapted to market developments: for users who have opted for water treatment with a salt chlorinator, the electrolysis contact option is also available. Depending on the chlorinator settings, the chlorine dose will be dispensed automatically based on whether the automatic cover is open or closed.

AESTHETIC FRENCH MANUFACTURING

The 146-mm-diameter roller shaft is made of anodized aluminum. The colored strip on the base is made of powder-coated aluminum. The rest of the housing is made of ASA, a polymer that is highly resistant to weathering and UV radiation. 4 trendy colors for the base, perfectly matching the white trim: **Charcoal Gray, Light Gray, Sand, White.**

And for an even more balanced look, the stainless steel safety straps are color-coordinated with the PVC slats.

** Please note: a safety cover is not a substitute for common sense or personal responsibility. Nor is it intended to replace the vigilance of parents or responsible adults, which remains the key factor when protecting others, especially young children.*

COVER CONNECT * MOBILE APP (OPTIONAL)

Built directly into the base, the Bluetooth receiver is invisible to the naked eye.

The app makes it easy to open and close the cover. For compliance with the **NF P90-308 standard**, the user must stay by the pool.

After a quick initial pairing process, the connection is established automatically with an unlimited number of smartphones.

Available in 8 languages for both Android & iOS. As an option, you can add a wireless wall-mounted control panel for even greater versatility and convenience. A keychain remote control is also available as an option, but it is not compliant with the NF P90-308 standard.

SVELTÉA, COMPONENTS:

AUTOMATIC COVER SLATS

The slats are an integral component of the above-ground automatic cover. They must comply with standards, look good and offer maximum durability.

PVC slats guarantee:

- standard-compliance,
- UV and impact resistance,
- a sleek slat profile and a wide range of colors to blend seamlessly with the surroundings,
- excellent buoyancy and watertightness thanks to the welded caps,
- a 3-year waterproofing warranty,
- compatibility with saltwater chlorinator water treatment,
- PVC slats cut to size for all pool configurations.

Efficiency according to the NF EN 17645:2022 standard

First slat fitted with a guide for winding onto the roller.

OPTIONAL WINTER NET FOR AUTOMATIC COVER

The automatic cover net is a very pocket-friendly solution for protecting your decking in winter and making it easier and quicker to reopen the pool in spring by preventing leaves, pine needles, and other unwanted debris from dirtying the cover. Very lightweight gray net, attached at all four corners of the pool.
